

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	2 October 2026
Team ID	6ab8b403c23107aaaa72d105 (Team 23)
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Ticket Creation	Custom table School IT Ticket with Caller, Short description, Description Auto-numbering of every ticket (SCH prefix)
FR-2	Automatic Classification	Trigger on Record Created where Category is empty Keyword classification of Short description (WiFi/Wi-Fi/Network, Projector, Forgot password, Slow Computer) Update Record with Category and Subcategory
FR-3	Caller Notification	Send Email to the Caller after classification Subject: "Your Request for the issue has been submitted." Body: "Ticket confirmation message."
FR-4	Data Quality	Category-Subcategory dependency (Wi-Fi-Network, Projector-Hardware, Forgot Password-Access, Slow Computer-Performance) State choice list; Caller/Assigned to/Assigned Group reference fields
FR-5	Deployment	Project Update Set completed with all configuration and exported to XML

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Caller fills only two fields (Caller, Short description); no technical category knowledge required
NFR-2	Security	Configuration captured in an update set; access controlled by ServiceNow roles; flow runs under system context
NFR-3	Reliability	Classification runs on every qualifying record insert; verified on 5 consecutive tickets (SCH0001002-1006)
NFR-4	Performance	Classification completes within seconds of record creation (background flow)

NFR-5	Availability	Runs on the ServiceNow platform (24x7 availability of the instance)
NFR-6	Scalability	No-code declarative design; new issue types added as extra Else-If branches without code changes
