

Project Development Phase
Model Performance Test

Date	02 October 2026
Team ID	6ab8b403c23107aaaa72d105 (Team 23)
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Model Summary	Flow Designer-based ticket classification. The flow is triggered for a new/updated ticket, evaluates ticket information using classification conditions, updates the relevant ticket fields, and routes the ticket to the appropriate assignment group.	Evidence: Flow Designer trigger, decision/condition logic, field-update and assignment actions.
2.	Accuracy	Training Accuracy - Not applicable (no ML model training used) Validation Accuracy - Not applicable (rule/flow-based classification)	Evidence: Test tickets covering valid and different ticket descriptions.
3.	Fine Tuning Result(if Done)	Fine-tuning - Rule/condition refinement based on test-ticket results. Classification conditions can be adjusted to improve routing coverage. No model fine-tuning is performed.	Evidence: Updated Flow Designer conditions and successful retest.
