

Project Development Phase

Model Performance Test

Date	02 October 2026
Team ID	6ab8b403c23107aaaa72d105 (Team 23)
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Ticket records rendered for analysis, including ticket ID, short description, category/classification, priority, state and assignment group. Evidence: Power BI data view.
2.	Data Preprocessing	Removed/handled blank values where applicable, standardized text fields, checked data types, and prepared classification/priority fields for reporting.
3.	Utilization of Data Filters	Filters for ticket category/classification, priority, state, assignment group and date/time were configured to analyze ticket distribution.
4.	DAX Queries Used	Measures such as Total Tickets, Classified Tickets, Unclassified Tickets and Classification Rate were used for reporting.
5.	Dashboard design	No. of Visualizations / Graphs - 5. Suggested views: total tickets KPI, classification distribution, priority distribution, assignment-group distribution and ticket trend.
6	Report Design	No. of Visualizations / Graphs - 5. Report pages organized to show ticket volume, classification performance and operational routing.
