

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	31 January 2025
Team ID	6ab8b403c23107aaaa72d105 (Team 23)
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

🕒 10 minutes to prepare
🕒 1 hour to collaborate
👤 2-8 people recommended

Before you collaborate

A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

🕒 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.

1 Define your problem statement

What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

🕒 5 minutes

PROBLEM
How might we [your problem statement]?

Key rules of brainstorming
To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

10 minutes

TIP
You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

TIP
Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

Ideation Phase — Brainstorm & Idea Prioritization Template

Date 2 October 2026	Team ID 6ab8b403c23107aaaa72d 105(Team 23)	Project Name Auto Ticket Classification using Flow Designer	Maximum Marks 4 Marks
-------------------------------	---	--	---------------------------------

Team Members: Amirthavarshini J (Team Lead), Ashwanth S, Deepan M, Aaditya Srinivasan K S

Step-1: Team Gathering, Collaboration and Select the Problem Statement

The team gathered over two sessions and reviewed helpdesk complaint patterns collected from students and teachers. Problems shortlisted:

- Manual ticket triage delays resolution start.
- Inconsistent category/subcategory selection by staff.
- Callers receive no acknowledgment when a ticket is logged.
- Repeated common issues (Wi-Fi, projectors, passwords, slow systems) consume staff time.

Selected problem statement: Automate ticket categorization at creation time so that every School IT Ticket is routed correctly without manual effort, and the caller is informed instantly.

Step-2: Brainstorm, Idea Listing and Grouping

Idea	Grouping
Keyword-based classification of Short description using Flow Designer	Automation
Machine-learning / Predictive Intelligence categorization	Automation
Chatbot front-end that asks users guided questions before ticket creation	Automation / Intake
Dependent Category–Subcategory choice lists to enforce clean data	Data quality
Auto-numbering and structured form layout for every ticket	Data quality
Instant email acknowledgment to the caller after classification	Communication
SLA tracking and auto-assignment to resolver groups	Future scope
Self-service knowledge articles for the top recurring issues	Future scope

Step-3: Idea Prioritization

Idea	Impact	Effort	Decision
------	--------	--------	----------

Keyword-based classification with Flow Designer	High	Low (no-code)	Selected for this milestone
Dependent choice lists + auto-numbering	Medium	Low	Selected
Email acknowledgment to caller	Medium	Low	Selected
Predictive Intelligence categorization	High	High (needs training data)	Deferred — future scope
Chatbot intake & SLA auto-assignment	Medium	High	Deferred — future scope

Reason: The selected ideas deliver the complete triage automation with zero scripting, fit the academic timeline, and were verified end-to-end in the PDI (tickets SCH0001002–SCH0001006 classified correctly).
