

Project Design Phase-II

Data Flow Diagram & User Stories

Date	2 October 2026
Team ID	6ab8b403c23107aaaa72d105 (Team 23)
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Student / Teacher	Ticket Creation	USN-1	As a caller, I can create a School IT Ticket with my name as Caller and a Short description of the issue.	Ticket saved with auto-number SCH... and State = New	High	Sprint-1
System	Auto Classification	USN-2	As the system, when a ticket is created with an empty Category, I classify it from Short-description keywords (WiFi/Wi-Fi/Network, Projector, Forgot password, Slow Computer).	Category & Subcategory populated within seconds; manually categorized tickets untouched	High	Sprint-1

[illegible]
