

Project Design Phase

Problem – Solution Fit Template

Date	2 October 2026
Team ID	6ab8b403c23107aaaa72d105 (Team 23)
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

1. CUSTOMER SEGMENT(S) Who is your customer? I.e. working parents of 0-5 y.o. kids	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? I.e. spending power, budget, no cash, network connection, available devices.	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital notetaking
Define CS, fit into CC	Define CS, fit into CC	Explore AS, differentiate
2. JOBS-TO-BE-DONE / PROBLEMS Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind the need to do this job? I.e. customers have to do it because of the change in regulations.	7. BEHAVIOUR What does your customer do to address the problem and get the job done? I.e. directly related: find the right solar panel installer, calculate usage and benefits; Indirectly associated: customers spend free time on volunteering work (I.e. Greenpeace)
Focus on J&P, tap into BE, understand RC	Focus on J&P, tap into BE, understand RC	Focus on J&P, tap into BE, understand RC
3. TRIGGERS What triggers customers to act? I.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.	10. YOUR SOLUTION If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.	8. CHANNELS of BEHAVIOUR 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7 8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.
Identify strong TR & EM	Identify strong TR & EM	Extract online & offline CH of BE
4. EMOTIONS: BEFORE / AFTER How do customers feel when they face a problem or a job and afterwards? I.e. lost, insecure > confident, in control - use it in your communication strategy & design.		
Identify strong TR & EM

Problem - Solution Fit (Team 23 — filled):

Existing problems (customer)	School IT helpdesk tickets are triaged manually: slow start on resolution, inconsistent Category/Subcategory selection, and no acknowledgment to the caller.
Existing behaviour	Staff read every request, guess the category, and route it; callers wait in silence and often re-explain the issue.
Our solution	Flow Designer flow 'Auto Classify School IT Tickets': on ticket creation (Category empty) Short-description keywords set Category + Subcategory; caller receives 'Your Request for the issue has been submitted.' by email.
Why it fits the customer state	Zero-scripting automation inside the institution's existing ServiceNow platform; callers keep using the same form but only fill two fields.
Adoption channels	School IT Ticket form (already in use), ServiceNow email service, and the existing helpdesk process - nothing new for callers to learn.
Problem-behaviour fit achieved	Verified on 5 live tickets (SCH0001002-1006): every ticket classified correctly and 5 confirmation emails logged; SkillWallet project progress 90%.
